I agree. If we think we might want to discharge to E at 2,000 gpm then we need to present it that way.

Scott,

I made some changes to the memo. For some reason my system would not allow me to track changes so what is in red needs to be removed and what is in blue added. I do not want to give DEQ what looks like a choice of how we decant the 145 million gallons. And now relooking at it, if we do not get a permit and decide to make Pond D active, and use Pond E as a holding pond for Pond D water, I would want to filter this water at 2000gpm as well. I realize this may affect a number of things.

Ken, your thoughts.

Mike

Subject: Possum Point DEQ request

Mike:

Attached is a draft memo for your use in responding to the VaDEQ contact that requested information pertaining to the flow and duration estimates for dewatering Ash Pond D as well as the treatment descriptions for the wastewaters generated from the Pond Closure Project.

Also, the accompanying exhibits and figures to the memo are attached. Note that Figure 1, Figure 2, Exhibit 1, and Exhibit 2 include edits that we sent over to Glover Construction for finalization. We will forward those as soon as they are available. Contact me if you have any questions. Thanks.

Sincerely,

Scott C. Quinlan, PE
